## Evergreen Transplants for Lining Out

## Juniper Glauca Hetzi

A spreading-type evergreen, decidedly blue, rapid in growth, and stands shearing well, making fine heavy stock.

While it is not a Chinensis, it closely resembles Pfitzeriana, but has the advantages of the blue-colored foliage and is somewhat more rapid and denser in growth. It makes up more readily as a staked spreader, is much more easily propagated by cuttings and is a more rapid grower when small.

### We offer for Spring 1942—

12,500—1 yr. T., 6 to 9 ins., at 17½c

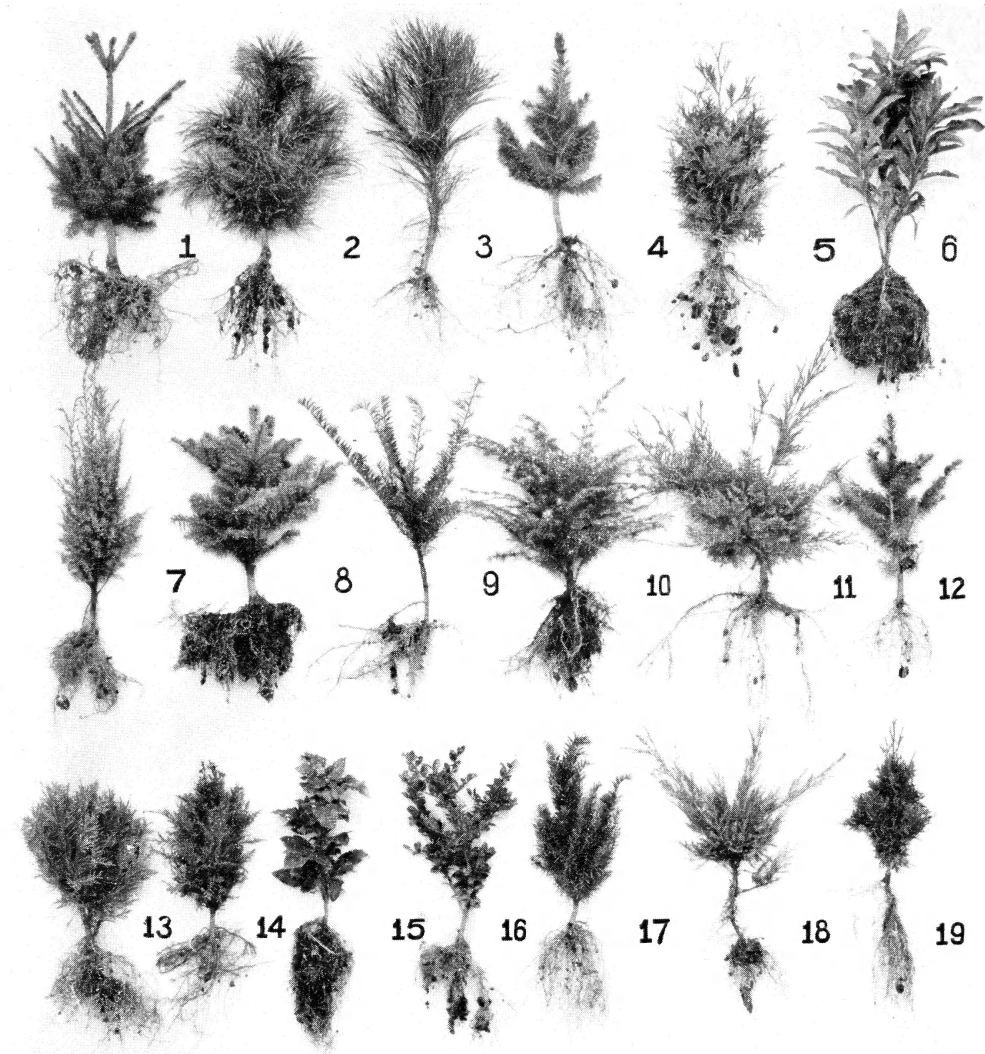

Offered in lots of 50 to 200 to a customer. Only 3000 left.

**Policy:** It is our desire to get this evergreen widely distributed throughout the trade and to serve as a source of lining-out stock for the next few years. We have

priced it reasonably and will endeavor to hold this price constant until affected by outside propagation. Have wood available to produce 50,000 annually, starting this Fall. Balled stock will be available first in the Fall of 1943. Not to be patented. For Fall 1942 and Spring 1943 we will book in lots up to 1000 1 yr. T 6-9" @ 17½c, 2yr. TT 10-15" @ 25c.
